

Private Server Setup Step-by-Step Procedure

- 1) Go to huggingface.co and create a hugging face account and verify email if you haven't already

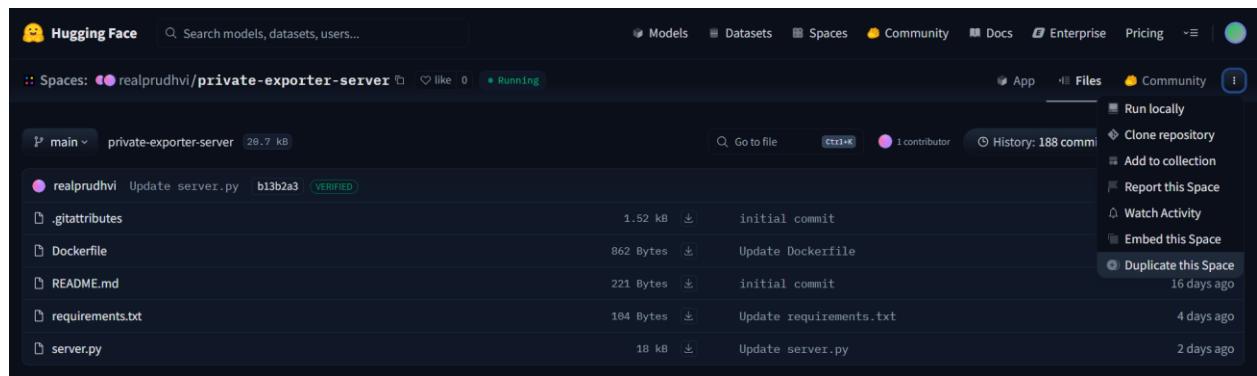

- 2) Click on the link below

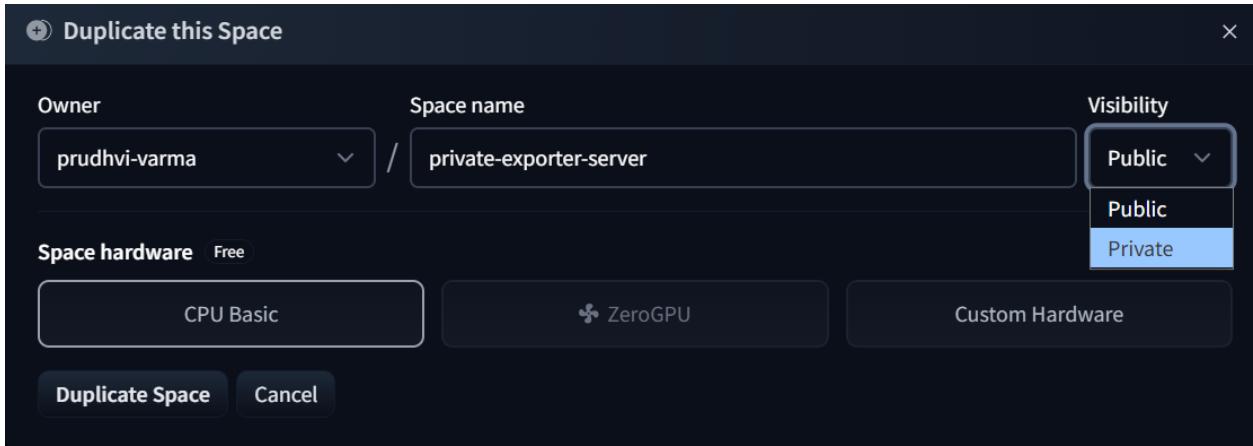

<https://huggingface.co/spaces/realprudhvi/private-exporter-server/tree/main>

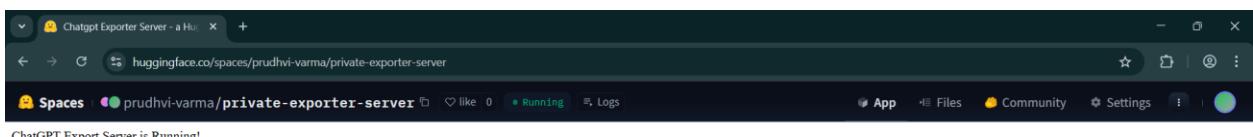

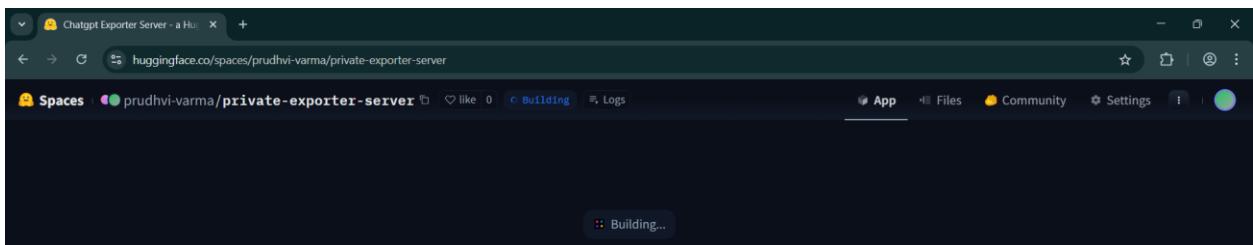

- 3) Click on the three dots and then "Duplicate this Space"

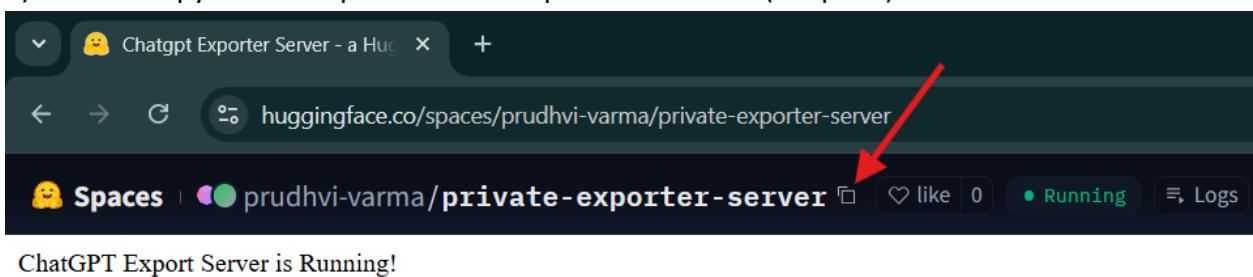

- 4) Click on the "Visibility" then choose "Private" and then "Duplicate Space"

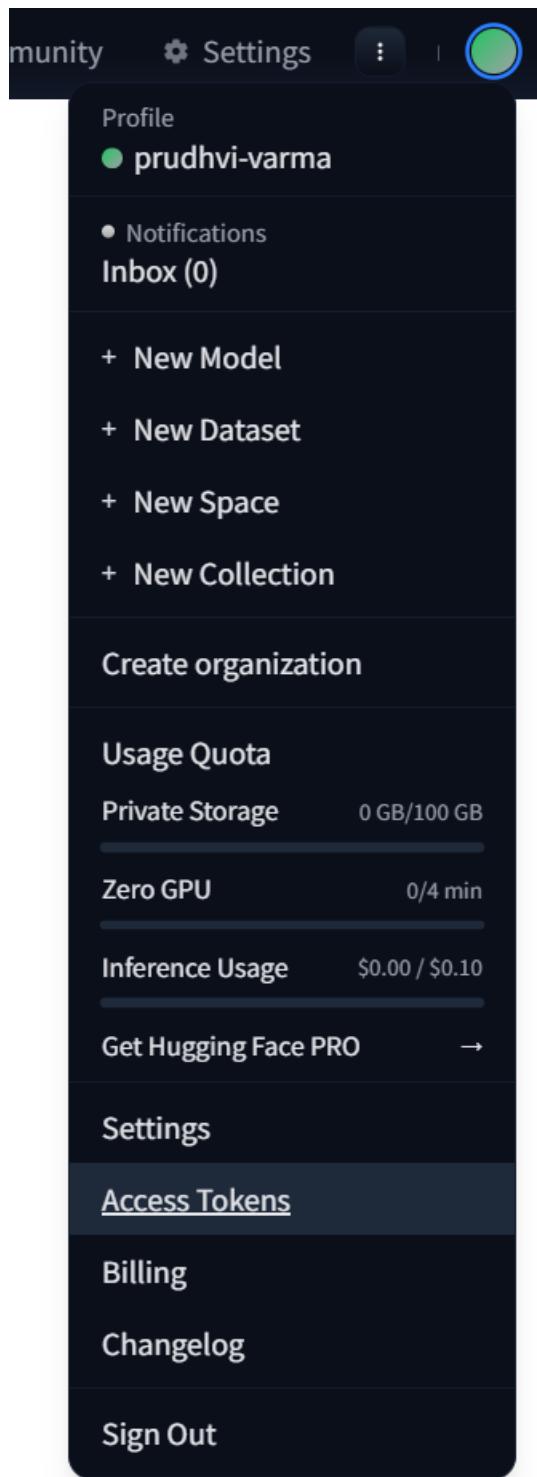

- 5) Wait till the server status changes from “Building” to “Running” (please wait for 3-5 mins)

- 6) Click on copy icon and paste it on notepad for later use (Step 11)

- 7) Click on the profile in the top right corner, then click on “Access Tokens”

Access Tokens

User Access Tokens

+ Create new token

Access tokens authenticate your identity to the Hugging Face Hub and allow applications to perform actions based on token permissions. **Do not share your Access Tokens with anyone;** we regularly check for leaked Access Tokens and remove them immediately.

You have no Access Token

- 8) Click on “Create new token”, choose “Read” and then click on “Create token”

< Create new Access Token

Token type

Fine-grained **Read** Write

! This cannot be changed after token creation.

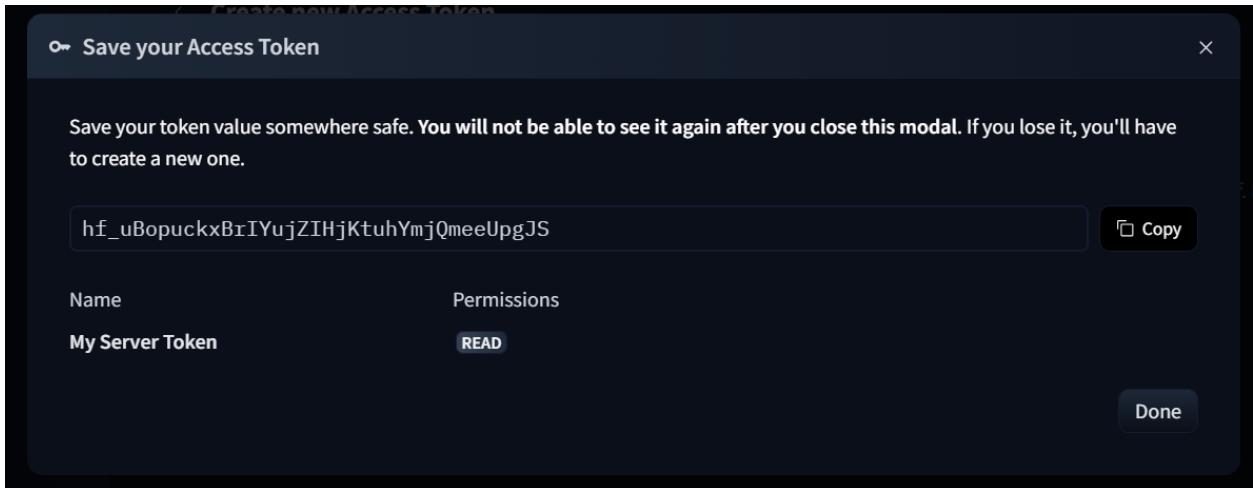

Token name

My Server Token

This token has read-only access to all your and your orgs resources and can make requests and comment on discussions.

Create token

- 9) Copy your Access Token and paste it on notepad if needed and click “Done”

10) verify that the access token has been created

Name	Value	Last Refreshed Date	Last Used Date	Permissions
My Server Token	hf...pgJS	2 minutes ago	-	READ

11) Go to the current Document_Suite_for_ChatGPT folder and then open background.js

Replace this part with the current space Url (from step 6)

```
const SERVER_URL = "https://realprudhvi-chatgpt-exporter-server.hf.space/export";
const HF_TOKEN = "";
```

Replace the highlighted section from section, and paste your Access Token

```
const SERVER_URL = "https://prudhvi-varma/private-exporter-server.hf.space/export";
const HF_TOKEN = "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";
```

Replace the / with –

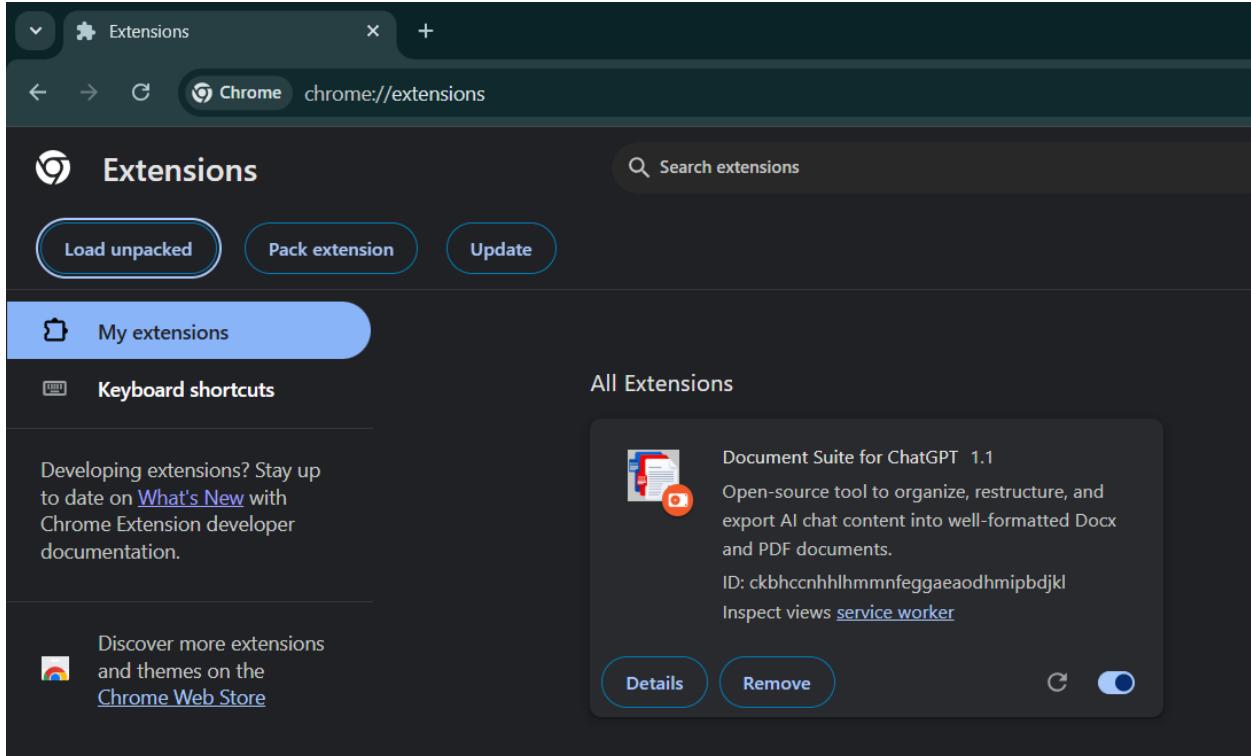

```

}
const SERVER_URL = "https://prudhvi-varma/private-exporter-server.hf.space/export";
const HF_TOKEN = "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";

const SERVER_URL = "https://prudhvi-varma-private-exporter-server.hf.space/export";
const HF_TOKEN = "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";

```

12) Go to chrome://extensions and reload the extension

13) Refresh chatgpt.com to use the private server

Note:

The Hugging Face Space hosting your private server automatically enters sleep mode after 48 hours of inactivity. During this period, the server is temporarily inactive. Upon receiving a new request, the server will automatically restart and resume operation. Please note that the first response after inactivity may experience a slight delay due to the server boot-up process. No manual intervention is required to restart the server.
